

Energy-Guru assistance in international financial closure for first Solar Thermal project in India

For Immediate Release (India)

Washington DC, April 7, 2011:

EnergyGuru® enabled first international project financing for first Solar-Thermal (CSP) Power Project In India

Energy Guru® a US based global clean energy hub and advisory services firm, is assisting many top Solar Power developers, commercial, industrial organizations in India, with their upcoming utility scale Solar CSP & PV power plant projects, including assistance on raising debt financing and technology collaboration for the projects. Energy Guru® has an ecosystem of top global players including developers, suppliers and financiers in clean energy field assisting over 800MW Solar PV and Solar CSP/Solar Thermal power project developers. Also Energy Guru is working closely with international financing sources to bring in attractive financing for some of utility scale Solar projects in India at rates as low as 4% without hedging.

Energy Guru's team provided its consulting services to Dalmia Solar Power Pvt. Ltd. and worked relentlessly with US EXIM project finance and Dalmia Solar team to create necessary application package, documentation, financial models for the long term project finance loan application and provided analytical services.

US EXIM's US\$30 million direct loan, will enable Dalmia Solar Power to purchase Infinia's PowerDish electricity system for its 10MW solar-thermal project in Rajasthan. This will also generate many jobs in US and India.

Ms. Geetanjali Patil Choori, CEO of Energy Guru said, "This is a big step for fledgling Indian Solar market. Ability to raise financing at low rates is critical to success of many Solar projects in India, making projects financially viable. The success is also a testimonial for Energy Guru's quality of services. It has attracted other Solar Power developers to us for raising debt financing and assistance on technology collaboration."

Energy Guru team consists IITians, Environmental Engineers, top B-School graduates, strong finance experts, clean energy experts with established industry eco-system connections.
